For Immediate Release

Former Aerosmith Guitarist to Play Live at Barnes and Noble

Dick Wagner will play live and sign his newly released book

Bethesda, MD, April 16, 2013: Dick Wagner, former lead guitarist for Alice Cooper, Aerosmith, and Kiss, will perform live on Thursday, April 18th at 7:00 pm at the Barnes & Noble in Burlington, MA, followed by a book signing for his newly released book, *NOT ONLY WOMEN BLEED, Vignettes from the Heart of a Rock Musician*. This touching, humorous, and racy memoir chronicles the performer's career in the rock industry, through a series of subsequent near fatal medical issues. He was diagnosed with an incurable brain condition known as Normal Pressure Hydrocephalus (NPH), which afflicts approximately 375,000 seniors in the United States. After brain surgery and a shunt implantation, he is back on the musical circuit inspiring his wide fan base. Dick's triumph over NPH is an integral part of his story. His book signings are both compelling and emotional as he weaves his musical performance with his story telling.

The book signing will take place on April 18, 2013 at 7:00 pm at the Barnes & Noble bookstore located at 98 Middlesex Turnpike, Burlington, MA. Mr. Wagner is available to press for interviews after the event. To schedule an interview, please contact Susan Michelson (602) 920-8115 or by email at suzy@desertdreamsllc.com.

About the Hydrocephalus Association

The Hydrocephalus Association (HA) is a charitable organization dedicated to eliminating the challenges of hydrocephalus by stimulating research and supporting people who are affected by this condition. Incorporated in 1986 as a San Francisco-based non-profit, HA is now the nation's largest and most widely respected organization dedicated solely to serving those affected by hydrocephalus. HA has been instrumental in creating a community of individuals, families and health care professionals addressing the complexities of hydrocephalus in all age groups.
