

HYDROCEPHALUS IN KENTUCKY

HYDROCEPHALUS IS A CHRONIC NEUROLOGICAL CONDITION THAT HAS NO CURE. ANYONE AT ANY TIME CAN DEVELOP HYDROCEPHALUS, FROM INFANTS TO SENIORS. THE ONLY TREATMENT REQUIRES BRAIN SURGERY.

CONTRIBUTIONS TOWARD A BETTER TOMORROW

UNIVERSITY OF KENTUCKY

2020 NIH NINDS **\$185,437**

Reversing inflammatory macrophage activation as treatment for neonatal intraventricular hemorrhage and hydrocephalus. Principal Investigator: Miller, Brandon

2020 NIH NICHD **\$512,893**

Noninvasive Noncontact High-Density Optical Imaging of Neonatal Intraventricular Hemorrhage. Principal Investigator: Yu, Guoqiang

2021 NIH NICHD **\$535,724**

Noninvasive Noncontact High-Density Optical Imaging of Neonatal Intraventricular Hemorrhage. Principal Investigator: Yu, Guoqiang

MAKING AN IMPACT

The Big Picture

- 2 Clinical Research Networks
- 1 Basic & Translational Research Network
- 2 Biobanks
- 1 Hydrocephalus Patient-Powered Registry
- 36% Decrease in Shunt Infection Rates
- 12 Preclinical Drug Therapies in testing
- 2 New Patent for a Drug Target
- 1 FDA Investigational New Drug Application
